OBJECTIVE

Seeking an entry-level position in the IT field where I can apply my knowledge of networking, secure coding, and web technologies to identify vulnerabilities and improve application security.

SKILLS

Languages	:	Python, Java,
Cybersecurity	:	Intrusion Detection, Network Monitoring
AI/ML	:	Classification Models, Data preprocessing
Web	:	HTML, CSS, JavaScript
Database	:	MySQL
Tools	:	Linux, OpenCV, Git
Concepts	:	Networking, Authentication

PROJECTS

Driver Drowsiness Detection System

- Built computer vision system to detect driver fatigue using eye-state recognition
- Used image processing and real-time monitoring to trigger alert mechanism
- Improved road safety by preventing accident-prone conditions
- Implemented using Python and OpenCV

AI-Based Intrusion Detection System (SecuVerse)

- Developed an intrusion detection system using machine learning to classify normal and malicious network traffic
- Preprocessed network dataset and trained classification model for attack detection
- Identified suspicious patterns and generated alerts for potential intrusions
- Demonstrated monitoring and threat detection

EDUCATION

B.Tech Information Technology – Government College of Engineering, Erode

2024 – 2027

CGPA : 8.58

CERTIFICATIONS

- **NPTEL** Introduction to Industry 4.0 and Industrial Internet of Things **(87%)**
- **Infosys SpringBoard** – C programming
- **Infosys SpringBoard** – Iot Platforms Overview
- **Cisco Networking Academy** – Introduction to Cybersecurity
- **NPTEL** Human Computer Interaction in English **(95%)**
